APRIL 2026 BATCH

Live Online Course for Ages 10-16

Your Child Builds Real AI Projects in 21 Days

Turn screen time into creation time. In just 1 hour a day, your child will build a website, a web app, and an AI portfolio - then present it all to you on Demo Day.

WHY THIS MATTERS

AI Will Be Part of Everything Your Child Does

The question isn't whether they'll use AI - it's whether they'll be passive consumers or confident creators.

AI is becoming part of everything

AI is rapidly becoming part of how students study, create, and eventually work. The advantage will go to children who know how to build with these tools responsibly - not just consume what AI gives them.

Screen Time Problem

Schools Aren't Teaching This

Most kids spend 4-6 hours daily consuming content. This course transforms that time into creation - building real things they can show you.

There's no formal AI curriculum in Indian schools. Kids are learning from random YouTube videos. They need structured, guided learning.

THE TRANSFORMATION

From Consumer to Creator in 21 Days

BEFORE THE COURSE

Passive AI User

- Uses ChatGPT to copy homework answers
- Thinks AI is "magic" or "scary"
- Consumes content for hours, creates nothing
- No idea how apps and websites are made
- Struggles to explain what they're learning

->

AFTER 21 DAYS

Confident AI Builder

- Uses AI as a creative partner for projects
- Understands how AI works and its limitations
- Has built 3 real projects they can show anyone
- Knows how to build websites and apps
- Presents their work confidently to parents

TANGIBLE OUTCOMES

What Your Child Walks Away With

Not worksheets. Not theory. By the end of 21 days, your child will have a live website, a working app, AI-generated creative assets, and a presentation they can confidently walk you through.

Personal Website

A live portfolio website showcasing their work, interests, and AI creations.

- Custom design with AI assistance
- Live on the internet (real URL)
- Mobile-responsive layout
- Shareable with family & friends

Functional Web App

A real application with user accounts, database, and working features.

- User login & authentication
- Database to store data
- Interactive features
- Works on any device

AI Portfolio

Collection of AI-generated images, videos, and multimedia projects.

- AI-generated artwork
- AI video creations
- Multimedia presentations
- Ready for school projects

DAY-BY-DAY CURRICULUM

The 21-Day Journey

Every day is hands-on. Every day they build something real.

DAYS 1-7	DAYS 8-14	DAYS 15-21
AI Explorer	**Website Builder**	**App Creator**
Images, Videos & Podcasts	Personal Portfolio Site	Working Web App + Demo Day

1 AI Explorer

Days 1-7: Discover AI tools and create stunning visuals

DAY 1-2
AI Image Creation

- Generate stunning AI artwork
- Learn the SPARK prompting framework
- Create movie posters & portraits

DAY 3-4
AI Video Basics

- Turn images into videos
- Add motion and effects
- Create short animations

DAY 5-6
AI Music & Audio

- Generate background music
- Create voiceovers with AI
- Combine audio with video

DAY 7
Weekend Project

- Create multimedia presentation
- Combine all Week 1 skills
- Present to classmates

Week 1 Output: AI multimedia presentation with images, video, and music

2 AI Builder

Days 8-14: Build websites and web apps from scratch

DAY 8-9
Website Fundamentals

- Design with AI assistance
- Build responsive layouts
- Add content and images

DAY 10-11
Personal Portfolio Site

- Create about page
- Add project gallery
- Publish to live URL

DAY 12-13
Web App Development

- Add user authentication
- Connect to database
- Build interactive features

DAY 14
THINK Framework

- AI safety and ethics
- Responsible AI usage
- Test and debug apps

Week 2 Output: Live portfolio website + functional web app with login system

AI Creator

3 Days 15-21: Polish projects and prepare for Demo Day

DAY 15-16

Project Enhancement

- Add advanced features
- Improve design and UX
- Fix bugs and optimize

DAY 17-18

Android App Export

- Convert web app to Android
- Generate APK file
- Test on mobile devices

DAY 19-20

Demo Day Preparation

- Create presentation
- Practice explaining projects
- Rehearse for parents

DAY 21

Parent Demo Day

- Live presentation to parents
- Q&A session
- Certificate ceremony

Week 3 Output: Polished portfolio + Android APK + live Demo Day presentation

PROPRIETARY FRAMEWORKS

Two Frameworks They'll Master for Life

These aren't just course concepts - they're mental models for working with AI effectively and responsibly.

SPARK

How to Talk to AI

A 5-step framework for writing prompts that get exactly what you want from AI tools.

- **S** **Specificity** — Be precise about what you want
- **P** **Persona** — Tell AI who it should be
- **A** **Action** — Define the exact task
- **R** **Result** — Describe the desired output
- **K** **Keep refining** — Iterate until perfect

THINK

How to Use AI Responsibly

A 5-step framework for making ethical decisions when working with AI tools.

- **T** **True?** — Is the information accurate?
- **H** **Helpful?** — Does this add value?
- **I** **Inspiring?** — Is it positive and constructive?
- **N** **Necessary?** — Is AI the right tool here?
- **K** **Kind?** — Does it respect others?

INDUSTRY-STANDARD TOOLS

10+ AI Tools Your Child Will Master

The same AI tools used by professionals at top tech companies.

ChatGPT | **Claude** | **Gemini** | **Lovable** | **Bolt.new** | **Runway** | **NotebookLM** | and 10+ more tools

EXPERT INSTRUCTION

Learn from an Experienced AI Trainer

Shaik Abdul Quddus

Tech Professional | 10+ Years in Industry

Photo

10+ years building technology at IBM, Cognizant, Accenture, and Tech Mahindra. A certified professional who brings real-world tech experience to help kids learn AI the right way.

THE GRAND FINALE

Parent Demo Day

On Day 21, your child presents everything they built - to you. This isn't just a course completion event. It's your child standing up, explaining their projects, and showing you exactly what they've learned.

> *"Watching my son explain his app to us on Demo Day - how it works, why he built it that way - was incredible. It was the first time I saw him take ownership of something technical and explain it with real confidence."*
>
> - Rajesh K., Parent of 12-year-old, Chennai

PARENT FEEDBACK

What Parents Say

*****

"My son used to just watch YouTube all day. Now he's the one showing ME how to use AI to edit photos. On Demo Day, he walked us through his portfolio website - I had tears in my eyes."

Priya M.
Parent of 14-year-old, Coimbatore | Pilot batch

*****

"I was skeptical - another online course, right? But when my daughter built a working app in week 3 and explained exactly how the AI helped her, I knew this was different. Worth every rupee."

Rajesh K.
Parent of 13-year-old, Chennai | Pilot batch

*****

"The instructor actually cared if my son understood. Small batch, real projects, no filler. He's already using what he learned for his school projects. That's rare."

Anitha S.
Parent of 15-year-old, Bangalore | Pilot batch

HOW WE COMPARE

Why rewire.school?

Feature	rewire.school	YouTube / Free	Other Classes
Live Instructor	Yes - daily live sessions	No	Sometimes

Feature	rewire.school	YouTube / Free	Other Classes
Batch Size	**Max 30 students**	Unlimited	50-100+
Real Projects	**Website + app + portfolio**	Rarely	Basic games
AI Focus	**100% AI-focused**	Mixed	Coding only
Parent Demo Day	**Yes - Day 21**	No	Rarely
Refund Policy	**100% after first session**	N/A	Varies

INVESTMENT

Course Fee

LAUNCH BATCH PRICE

Rs.14,999 ~~Rs.24,999~~

Rs.714 per session | 40% savings | 21 live sessions

What's Included

- 21 live sessions (1 hr each)
- Project feedback & review
- Parent Demo Day
- Session recordings (lifetime)
- Android APK export
- Small batch (max 30 students)
- Weekly parent updates
- Certificate of completion
- SPARK + THINK framework cards
- WhatsApp support group

100% Money-Back Guarantee - Full refund after the first session if it's not the right fit

QUESTIONS ANSWERED

Frequently Asked Questions

What age group is this for?

This course is designed for students aged 10-16. The curriculum is flexible enough to challenge older students while remaining accessible for younger ones.

Does my child need coding experience?

No coding experience is required. We use AI-assisted tools that allow students to build websites and apps without writing traditional code.

What device does my child need?

A laptop or desktop computer with a stable internet connection. Tablets and phones are not suitable. Chrome or Firefox browser is recommended.

What if my child misses a session?

All sessions are recorded and shared within 24 hours so students can catch up quickly.

Why is the fee Rs.14,999?

This is a live, guided cohort - not a video course. Your child gets 21 live sessions, project feedback, small-batch attention (max 30), parent updates, session recordings, Demo Day, and a full refund option after the first session.

How does the refund guarantee work?

After the first session, if you or your child feel this isn't the right fit, simply email us within 24 hours and we'll refund 100% of your fee. No questions asked.

NEXT BATCH

April 2026 Batch Details

BATCH STARTS	SESSION TIME	REGISTRATION CLOSES
April 14	**5 PM - 6 PM**	**April 5**
